

ROUGHNECK BERM INSTRUCTIONS

The AIRE Environmental Roughneck Berm is built with oil field conditions in mind. It's constructed of specialized chemical and UV resistant material and touts a robust three layer driving surface.

WHAT YOU NEED TO KNOW

SITE PREP

1. Clear debris from the deployment area.

DEPLOY

1. After removing the berm from its packaging, orient it so that it will roll out in the correct location.
2. Unfasten the cam straps.
3. Roll out and unfold the berm.

USE

Roughneck Berms perform best when driven into from the ends. Doing so will minimize stress to the walls and utilize the three layer driving surface for maximum berm longevity.

RECOMMENDED PRODUCTS

Mini Spill Kit

Wash Down Pad

Wellhead Berm

Duck Pond Berm
